Jira & Confluence

Richard Aguirre

I am a technology and telecommunications engineer passionate about the world of programming, web design, automation, and process improvement. With a solid technical background, I have developed skills in big data management, data analysis and process automation. In addition, I have experience in project management, teamwork, reporting and dashboarding in Power BI, and customer support.

WORK EXPERIENCE

BME-SIX company (REGIS-TR) / Junior Project Management

 From Apr 2022 to Actual

- Support in the analysis of business cost projects, elaboration of dashboards with Power BI.
- Support in the implementation of agile scrum and waterfall methodology in project management.
- Experience and work with Jira software (flows, issues architecture, kanbans, gantts, dashboards, JQL filters) and Confluence (implementation of project documentation pages).

BME-SIX company / Trainee Project Management

 From Nov 2021 to Mar 2022

Part-time job, where I have been working with Jira and Confluence for project management and developing dashboards with Power BI from an enterprise view.

- PM support tasks.
- DB extractions using MySQL queries.

BIP IBERIA / Trainee IT consulting

 From Feb 2019 to Nov 2019

Full time intern, working for a large company providing IT support in a PMO. Experience in,

- ETL (extract, transform and load) of data using SQL, PowerShell, VBA, and Power BI.
- Customer communication and IT incident resolution support.
- Ad-hoc report generation and reporting.
